Profile

Engineering student in IT Governance and Information Systems Management, with solid Full Stack experience (Java Spring Boot, Angular, React Native) and a certified SAP background (ABAP, CDS, RAP, Fiori). Looking for a **final-year internship in SAP development (ABAP / RAP / BTP)** starting January 2027.

Education

Engineering Degree — IT Governance and Information Systems Management

National School of Artificial Intelligence and Data Sciences (ENSIAD), Morocco

2025 – 2027

DEUP in Computer Engineering (two-year university degree)

Ibn Zohr University

2022 – 2024

Professional Experience

Full Stack Developer Intern — Riche Bois, Casablanca

June 2026 – Aug. 2026

Built a complete transport and delivery management solution (web, mobile and back office).

Developed a secured Spring Boot backend (JWT, Keycloak) integrated with the company's ERP (Divalto).

Delivered a React Native driver app: QR code scanning of deliveries, geolocation and real-time trip tracking.

Generated delivery notes with JasperReports and built supervision dashboards in Angular.

Freelance ERP & Mobile Developer — Taroudant

Feb. 2026 – May 2026

Designed and developed a custom ERP for a coworking space.

Built a React Native mobile application with 24 screens.

Implemented secured REST APIs with Spring Boot, JWT and PostgreSQL.

Deployed the services with Docker on Microsoft Azure.

Full Stack Intern — Riche Bois, Casablanca

July 2025 – Sept. 2025

Developed business applications with Spring Boot and Angular, integrated with the company's ERP.

Migrated and secured access management with Keycloak: OAuth2, MFA and role management.

Projects

Business Management Application — SAP BTP, ABAP RAP

2026

Data modeling with CDS views (projections, associations, UI annotations).

Managed RAP implementation: behavior definitions, validations, determinations and actions.

Exposed an OData V4 service consumed by an SAP Fiori Elements application.

Developed on SAP BTP (ABAP Environment) with Eclipse ADT and abapGit.

E-Commerce Microservices Platform

2026

Spring Boot microservices (authentication, products, orders, notifications) secured with Keycloak/OAuth2, asynchronous communication via RabbitMQ, Angular front end, CI/CD on Microsoft Azure.

SAP Development

ABAP Objects: OOP, classes, interfaces, design patterns

CDS: views, annotations, projections, data modeling

RAP: OData services, behaviors

OData v4 & SAP Fiori: service exposure, SAP front-end apps

Smartforms: printed documents (delivery notes, invoices, reports)

Technical Skills

Languages

ABAP / ABAP Cloud, Java, JavaScript, SQL, Python

Backend

Spring Boot, Spring Data JPA, Hibernate, REST API, Microservices

Frontend

Angular, React.js, React Native, SAP Fiori Elements

Databases

PostgreSQL, MySQL, SQL Server

Cloud & DevOps

Docker, Kubernetes, Azure, SAP BTP, CI/CD, Git

Security & Messaging

Keycloak, OAuth2, JWT, Kafka, RabbitMQ

Certifications

SAP Learning Journey: Back-End Developer – ABAP Cloud

Mar. 2026 – May 2026

Languages

Arabic Native

French C1

English B2+
