PROFILE

Engineering student passionate about the SAP ecosystem and certified in ABAP Cloud development. Having built a strong foundation in Clean Core architectures and the RAP programming model, I am seeking a final-year internship to experience the reality of the field and continue learning alongside experts. Highly motivated and eager to learn, I aim to fully commit and contribute to the success of your SAP projects.

EDUCATION

National School of Artificial Intelligence and Data Sciences (ENSIASD) <i>Engineering Degree in IT Governance and Information Systems Management</i>	Morocco 2025 – 2027
Ibn Zohr University <i>DEUP in Computer Engineering</i>	Morocco 2022 – 2024

WORK EXPERIENCE

Riche Bois <i>Developer Intern</i> - Engineered a transport management solution (web, mobile, back-office), boosting delivery tracking efficiency by 30%. - Developed a secure backend (JWT, Keycloak), integrating with the Divalto ERP to ensure data consistency. - Delivered a React Native driver app with QR scanning and real-time geolocation, reducing route completion time by 15%. - Generated automated delivery notes via JasperReports and designed dashboards for 5+ supply chain managers.	Casablanca, Morocco June 2026 – Aug. 2026
Freelance <i>ERP & Mobile Developer</i> - Designed and deployed a custom ERP system for a coworking space, centralizing daily operations into a single platform. - Built a React Native mobile application with 24 distinct screens, increasing member engagement by an estimated 40%. - Implemented secure REST APIs using PostgreSQL, handling 100% of daily transactions with zero downtime.	Taroudant, Morocco Feb. 2026 – May 2026
Riche Bois <i>Developer Intern</i> - Developed internal business applications integrating with the ERP to boost workflow efficiency by 20%. - Migrated access management to Keycloak (OAuth2, MFA), successfully securing user data and eliminating unauthorized access vulnerabilities.	Casablanca, Morocco July 2025 – Sept. 2025

PROJECTS

Business Management Application SAP BTP, ABAP RAP, CDS, OData V4, Fiori - Architected data models utilizing CDS views and UI annotations, providing a solid foundation for complex business logic. - Programmed a managed RAP implementation with behavior definitions, ensuring 100% adherence to critical business rules. - Exposed an OData V4 service for an SAP Fiori Elements application, delivering a seamless interface for end-users. - Developed scalable solutions on SAP BTP using Eclipse ADT and abapGit, demonstrating adaptability to modern cloud environments.	2026
Print Forms Portfolio SAP Smart Forms, SAPscript, Adobe Forms, ABAP - Developed 6+ print documents including delivery notes, invoices, and interactive Adobe Forms, eliminating manual paperwork. - Implemented driver-programs for data interfaces and OTF-to-PDF conversions, achieving 100% automated document generation.	2026

TECHNICAL SKILLS

SAP Core: ABAP, ABAP Cloud, RAP, SAPscript, Smartforms, Adobe Forms, CDS Views, OData, Fiori
Languages: Java, JavaScript, SQL, Python, ABAP
Backend & Frontend: Spring, REST APIs, React Native, SAP Fiori Elements
Databases & Tools: PostgreSQL, MySQL, SAP BTP, Git, Jira, Scrum

CERTIFICATIONS

SAP Learning Journey: Back-End Developer – ABAP Cloud	Mar. 2026 – May 2026
