EDUCATION

National School of Artificial Intelligence and Data Sciences (ENSIASD) <i>Engineering Degree in IT Governance and Information Systems Management</i>	Morocco 2025 – 2027
Ibn Zohr University <i>DEUP in Computer Engineering</i>	Morocco 2022 – 2024

WORK EXPERIENCE

Riche Bois <i>Full Stack Developer Intern</i> - Engineered a transport management solution (web, mobile, back-office), boosting delivery tracking efficiency by 30%. - Developed a secure Spring Boot backend (JWT, Keycloak), integrating with the Divalto ERP to ensure data consistency. - Delivered a React Native driver app with QR scanning and real-time geolocation, reducing route completion time by 15%. - Generated automated delivery notes via JasperReports and designed Angular dashboards for 5+ supply chain managers.	Casablanca, Morocco <i>June 2026 – Aug. 2026</i>
Freelance <i>ERP & Mobile Developer</i> - Designed and deployed a custom ERP system for a coworking space, centralizing daily operations into a single platform. - Built a React Native mobile application with 24 distinct screens, increasing member engagement by an estimated 40%. - Implemented secure REST APIs using Spring Boot and PostgreSQL, handling 100% of daily transactions with zero downtime.	Taroudant, Morocco <i>Feb. 2026 – May 2026</i>
Riche Bois <i>Full Stack Intern</i> - Developed internal business applications using Spring Boot and Angular, integrating with the ERP to boost workflow efficiency by 20%. - Migrated access management to Keycloak (OAuth2, MFA), successfully securing user data and eliminating unauthorized access vulnerabilities.	Casablanca, Morocco <i>July 2025 – Sept. 2025</i>

PROJECTS

Business Management Application <i>SAP BTP, ABAP RAP, CDS, OData V4, Fiori</i> - Architected data models utilizing CDS views and UI annotations, providing a solid foundation for complex business logic. - Programmed a managed RAP implementation with behavior definitions, ensuring 100% adherence to critical business rules. - Exposed an OData V4 service for an SAP Fiori Elements application, delivering a seamless interface for end-users. - Developed scalable solutions on SAP BTP using Eclipse ADT and abapGit, demonstrating adaptability to modern cloud environments.	2026
E-Commerce Microservices Platform <i>Spring Boot, Angular, Azure, RabbitMQ, Docker</i> - Engineered an E-Commerce platform using Spring Boot microservices and Angular for authentication, products, and orders. - Secured endpoints with Keycloak/OAuth2 and integrated RabbitMQ, improving overall system response time by 30%. - Orchestrated an automated CI/CD pipeline on Microsoft Azure, streamlining deployment workflows and accelerating release cycles.	2026
Print Forms Portfolio <i>SAP Smart Forms, SAPscript, Adobe Forms, ABAP</i> - Developed 6+ print documents including delivery notes, invoices, and interactive Adobe Forms, eliminating manual paperwork. - Implemented driver-programs for data interfaces and OTF-to-PDF conversions, achieving 100% automated document generation.	2026

TECHNICAL SKILLS

SAP Core: ABAP, ABAP Cloud, RAP, SAPscript, Smartforms, Adobe Forms, CDS Views, OData, Fiori
Languages: Java, JavaScript, SQL, Python, ABAP
Backend & Frontend: Spring Boot, REST APIs, Angular, React Native, SAP Fiori Elements
Databases & DevOps: PostgreSQL, MySQL, Docker, Kubernetes, Azure, SAP BTP, CI/CD, Git

CERTIFICATIONS

SAP Learning Journey: Back-End Developer – ABAP Cloud	<i>Mar. 2026 – May 2026</i>
